Highly skilled software designer with expertise in backend development and server-side web application design. Proven track record of seamlessly integrating front-end components into robust and efficient applications. Proficient in Microsoft and Huawei services, specializing in process automation and leveraging cutting-edge technologies. Goal-oriented and driven to contribute to the success of challenging projects while pushing the boundaries of innovation.

Valuable skills in Huawei web development, adding to expertise and value.

WORK EXPERIENCE

Planning and Budget   Kombolcha, Ethiopia

Development Lead   March 2024 - present

- ✓ As the Development Lead at Planning and Budget System, I oversee end-to-end software solution development, guiding a team of developers, managing project timelines and resources, and ensuring the delivery of high-quality software aligned with business objectives. I gather stakeholder requirements, prioritize innovation, and maintain a focus on quality assurance and industry trends to drive tailored and competitive solutions.

Backend Developer   March 2024 - present

- ✓ As a Backend Developer at Planning and Budget System, I handle server-side web application logic, integrate front-end work, develop web services and APIs, optimize server performance, ensure data protection, and maintain stable web applications.

Frontend Developer   March 2024 - present

- ✓ As a Front-End Developer at Planning and Budget System, I handle the client-side aspects of web application development, collaborating closely with Backend Developers to ensure seamless integration with server-side logic. My responsibilities revolve around designing and implementing the user-facing elements of the application, optimizing performance, and delivering a smooth user experience.
